Forbes & Company Limited is one of the oldest company in the world that is still in business.

Our story goes back to the year 1767 when John Forbes of Aberdeenshire, Scotland started his business in India, then engaged in manufacturing, trading, and shipping.

We have come a long way since inception, diversifying into several businesses and earning international acclaim. Our strengths lie in multiple domains such as manufacturing precision tools, marking and coding solutions, industrial automation solutions, realty, and shipping. Today, we are present in more than 35 countries.

In 2000, the Shapoorji Pallonji Group took over Forbes & Company Limited. Established in 1865 in India, a globally diversified institution, the SP Group has a leading presence in the sectors of Engineering & Construction, Infrastructure, Real Estate, Water, Energy and Financial Services. A dedicated 69,000 people workforce delivers end-to-end solutions across over 70 countries. The group companies build mega-structures, develop multifaceted iconic landmarks, drive innovative technologies in water management, renewable energy, oil & gas and power, with a focus on good governance and sustainable development, to engineer a better planet.

Forbes & Company Limited has a tradition of excellence and total customer delight as its singular mission. Engineering Division of Forbes began its journey with the manufacturing of BBBB Spring Lock Washers in Mumbai and expanded its capabilities to manufacture a range of high precision cutting tools under the brand Totem and Marking and Traceability Solutions under brand name Bradma. All our products are created in our world class manufacturing facility in Waluj, Aurangabad. Our ISO 9001:2015 certified factory is fitted with ultra-modern state-of-the-art machinery imported from countries like Germany, Switzerland and Australia. Manufactured on international CNC machines and quality tested through simulation tests in renowned branded testing equipment.

With increase in Do-it-Yourself (DIY) culture gaining foothold in India. Forbes has come up with complete range of Hand Tools and PTA accessories under the brand name Forbes Kendo. These ranges of products are suitable for daily use for personal as well as professional needs. These products even act as a good compliment to our Totem cutting tools. All our tools meet the highest quality standard at an attractive price point. Our existing strong distribution network of Totem across the Indian market has been leveraged to ensure easy product availability.

Note: Ratcheting type available on request

SPECIFICATIONS

- The high strength alloy steel and precise heat treatment makes the torque wrenches solid and built to last
- Supplied with an aesthetically pleasing blow moulded plastic box
- With a torque tolerance of $\pm 3\%$, the accuracy exceeds ISO 6789:2017
- Sight, touch and sound accurately lets the user know that the torque has being achieved even in a noisy environment
- The synthetic handle is manufactured by specially selected resin (upto TWM 250) which provides comfort and durability and resists chemical
- Bi Directional Torque can be applied in both right handed and left handed threaded nuts and bolts
- Suitable for automobile and other industrial usage
- Four scales upto TWM250 and TWM400 available in three scales
- Range: 5 - 540 N.M
